A WORLD OF MAGNETIC TOYS

Magnetism is an invisible force, just like the mind: something that is there but that you cannot see. This is the reason behind its magic and its ability to inspire children's curiosity and intelligence. Since 2008 Geomagworld SA has been exploring the incredible potential of magnetism for playing and learning. Our products help children of all ages develop and train their minds, imagination and curiosity through the science of magnetic construction. Each year, Geomag introduces new and innovative product lines. We have achieved success all over the world, confirming our drive to create the highest quality play experience for children. Geomag has received several international awards for quality and play value. These awards include: Dr. Toy "Best Classic Toys" Award, Parents Choice Award "Magnetic Challenge, Dr. Toys "Best Children's Products", Oppenheim Toy Portfolio "Gold Seal", Toy of the Year "Specialty Toy", Creative Child Magazine "Preferred Choice Award: Construction", National Parenting Awards "Gold Winner", and Scholastic Parent & Child "Gold Star Award".

PROUD TO BE SWISS MADE

Geomagworld SA manufacturing complies with the most rigorous European and International safety standards, traditionally found in Swiss products.

We follow each production phase step by step at our facility in Novazzano, Switzerland. Our magnetic rods, spheres and panels are exceptionally high quality, thanks to the high standards we apply when selecting materials.

Geomag ensures our products are made for a safe play experience.

PLAY AND LEARN

Geomagworld SA aims to promote awareness and understanding of magnetism through play, in order to develop creativity and stimulate learning. We try to nurture curiosity and intellect in children of all ages. Everyone can learn to train their minds by playing with Geomag, all while having fun.

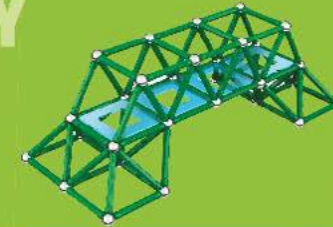

SCIENCE

Feel the invisible yet tangible magnetic power of Geomag. Build your own compass and understand polarities.

TECHNOLOGY

Once you have built your own stable Geomag structure, you will understand what amazing feats technology can achieve.

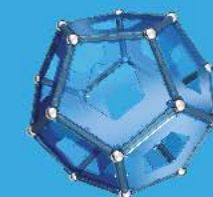

ENGINEERING

Carefully manage the polarities to build gears that interact and rotate without touching. Make bearings out of Geomag spheres to create smooth motion.

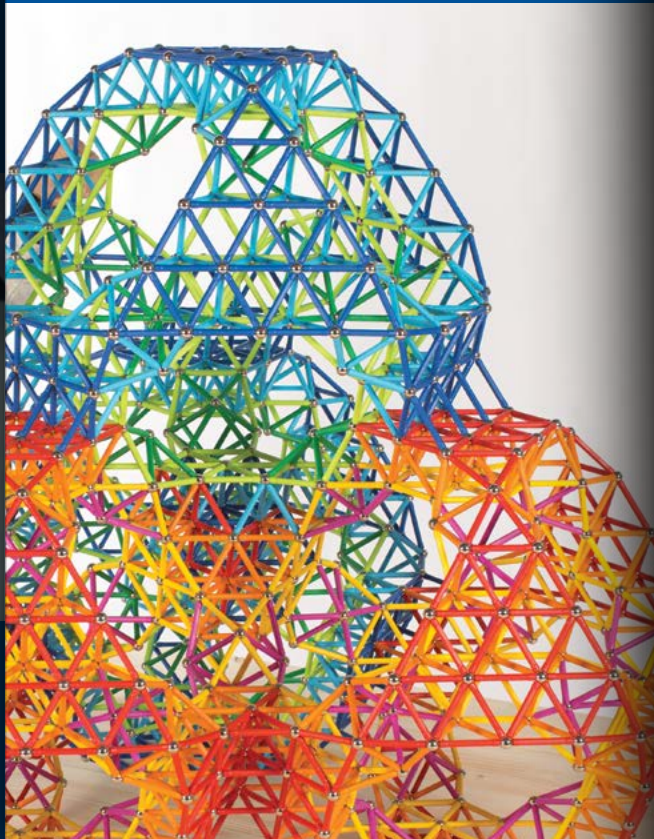

MATHEMATICS

Enjoy transforming 2D polygons into 3D geometric shapes. You can even prove Pythagoras' Theorem with Geomag!

STEM is an interdisciplinary approach to learning where kids apply science, technology, engineering and mathematics in real life contexts. Our creative toys ensure they learn to use their imagination to find unique solutions to problems, exploring multiple possibilities. Their hand-eye coordination is developed alongside spatial skills and awareness, making them agile as they play and learn.

GEOMAG MECHANICS

Get the fun rolling with Geomag Mechanics, the latest magnetic construction system.

The Mechanics line is a new play system, not just an extension of the Geomag Classic range but a construction set that highlights the invisible forces and helps to discover an intangible world. Discover magnetism in movement, in the compass and in interactions between the different models.

GEOMAG PRO-L

Grow up with Geomag.

Geomag PRO-L is the evolution of the original magnetic construction system, designed with growing kids in mind. It allows for the creation of incredible structures thanks to the power of its special black magnet. The polarity indicator is visible on the bars, to fully understand the potential of magnetism.

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal blue lines across its entire width. The lines are thin and consistent in color, set against a plain white background. There are no margins, text, or other markings present on the page.This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
