Play face to face with **Mother EARTH**

...and discover how to preserve our
precious planet!

COMPLETE MISSIONS GIVEN BY MOTHER EARTH.

Answer questions in four categories, together.

Right answers lead you closer to saving the planet.

For each wrong answer, you receive damage cards that will block your way.

- Co-operational gameplay
- Rotating board and sliding cards
- Multiple choice questions

8+ 2-6 45+

Contents:

- Rotating board
- 300 cards: Question, Mission & Damage
- 24 answering chips
- 1 wooden game piece
- 2 wooden dice
- Rules

ON YOUR TURN: Roll the dice and rotate the **inner circle**.

Slide available cards from the outer circle (not all fit).

Move the pawn (only on the inner circle) and answer that question, together. Fill the cards on the outer circle from the category decks.

ENOUGH RIGHT ANSWERS: Move the card to the center of the board. Aim to collect the right amount of category cards (on Mother earth's mission card).

NOT ENOUGH RIGHT ANSWERS: Discard the card and place a Damage card on the outer circle. It will block 1 of the places ...but which one? It adds strategic play. Note: Damage card can also come from the A-B-C die.

GAME ENDS:

- If too many Damage Cards are played.
- All players complete their Missions.

QUESTION CATEGORIES:

-  Environmental agreements & practices
-  Recycling & sustainable consumption
-  Endangered species & biodiversity loss
-  Environmental education & skills

Do you know how to recycle correctly, and how to reduce the burden on the Earth? And would you like to learn how to help endangered animals and prevent biodiversity loss?

Mother EARTH is an educational board game full of simple ideas on how we can make a difference in helping our planet.

The resources of Mother Earth are abundant but limited. The time has come for us to show gratitude and take care of Mother Earth. Let's take action towards sustainability together, through positivity.

Trivia content for the Mother Earth board game will be developed in cooperation with the students at the University of Lapland studying sustainable development and educational sciences.

The game is manufactured sustainably and plastic-free in our own factory in Finland.
