plasto® **ICONIC PLAY SINCE 1954!**

PLASTO VIDEOS www.youtube.com/@plasto7325

Plasto is widely known for its durable and iconic play products that have brought joy to children for generations. Plasto's ride-on scooter, trucks, and various sand and outdoor toys are a familiar sight in Finnish playgrounds.

Plasto is a Finnish company with a long tradition and strong expertise in the toy industry. The factory was established in 1954 and it is located in Åland.

Two traditional toy industry players joined forces when Tactic Games acquired Plasto in 2024. This acquisition further strengthens the future of domestic toy production in Finland.

All Plasto toys are made in Finland and carry the Key Flag symbol, which signifies their Finnish origin and high quality.

BIOPLASTICS

A SUSTAINABLE CHOICE!

The plastic in these toys is produced from sugar cane that is 100 % renewable.

This contributes to reducing CO2 emissions and carbon footprint, since the sugar cane binds more carbon dioxide when growing than is emitted when producing the plastic raw material from it (-2,78 CO2 eq/kg).
